# NECTO 16

Centralized & State of The Art BI

Panorama Necto uncovers the hidden insights in your data and presents them in beautiful dashboards, it is powered with KPI Alerts and managed by a centrally administered system. Necto employs unique recommendation, personalization, and insight finding technologies that enable users to discover what they need to know and use collaboration capabilities to quickly address the issues found.

What is Panorama Necto 16 and why is it unique?

Necto is a **Centralized & State of The Art BI Solution**. As a leader in BI & smart data discovery, it allows you to mashup all your data and use automated analytics to make sense of it, via the most secure and scalable web solution.

Necto 16 is the next generation of BI and data discovery solutions. It leverages a suggestive discovery engine under the covers to simplify the business user's data preparation while automating pattern exploration and analysis, powered by a powerful advanced visualization and collaborative platform that is unified and governed.

Our users love Necto's automated functionalities, its simple and fast development and easy sharing of BI content.

Allowing Panorama Necto uncovers the hidden insights in corporate data and proactively push those insights to business users via beautiful dashboards and KPI alerts.

Panorama is the #1 BI solution which is optimized and fully reliant on the Microsoft BI platform, with thousands of customers around the world.

Panorama Necto is the most secure, centrally administered, and scalable system for enterprise grade BI, with our top customers investing hundreds of thousands of dollars in Microsoft, every year.

Necto is available on Azure!

How it happened

Why it happened

Who are the relevant people

What happened

How to **solve** it

"We revamped our BI solution in order to manage and most importantly extract value from the massive amounts of data we generate every month"

- Director of a leading healthcare organization

Allows you to go mobile.

Working for You

Panorama Necto works with your Microsoft Azure infrastructure to simplify the data analysis for the users providing them relevant business insights.

Benefit from Necto 16 and Microsoft Azure

Easy to deploy a fully functioning solution with only a few clicks.

All the resources you know and love from Azure are available to you.

Connecting to data that you already have on Azure making a full data analysis solution that is highly dynamic and cost effective.

Panorama & Microsoft Azure

Panorama and Microsoft have a long-standing relationship, which started when Microsoft acquired Panorama's first generation technology to drive their entry into the BI arena, and continued over many years of collaboration. Panorama has deep experience utilizing Microsoft technologies and platforms to build innovative customer-focused business intelligence solutions. The Azure Marketplace and Necto offer users new Cloud based capabilities including:

• Easy to deploy a fully functioning solution in seconds.
• Resources from Azure are available as part of the solution.
• Connecting to data already on Azure makes a full data analysis solution that is highly dynamic and cost effective.

Why Panorama Necto?

Panorama Necto uncovers the hidden insights in your data and presents them in beautiful dashboards, powered with KPI Alerts, and managed by a centrally administered system.
